

A photograph of a classic car in a garage. The car is primarily black with a red roof and rear section. It is parked on a concrete floor. In the background, there are shelves with various items and a red cabinet with the '3M' logo. The lighting is dramatic, highlighting the car's curves and the reflective surfaces of the wheels and body panels.

FOOSE DESIGN WHEELS FORGED

VINTAGE FORGED

Forged centers specifically designed to accommodate taller hubs on vintage cars welded or bolted into spun-forged or cast rims.

RAT PACK

Foose Rat Pack wheels are 2 pc. forged mono.2 construction. The faces are machined from billet aluminum and are blind bolted from the backside onto spun forged inner barrels. The lip is painted white with a red strip, simulating the look of a white wall tire. High performance low profile tires can be used on larger diameters without losing the white wall appearance.

FORGING PROFILE OPTIONS

PICK THE RIGHT FORGING PROFILE FOR YOUR WHEEL TO MAXIMIZE FITMENT.

Depending on your needs we can tailor a center profile design that maximizes brake clearance, Lip size and offset. All we need is a few measurements or specs and we can give you the wheel you want in a fitment you want
